About

Computer Science undergraduate passionate about software engineering, full-stack development, and DevOps. Strong foundation in Java, DSA, web development, and system design, with experience building scalable applications and actively contributing to technical communities through leadership and innovation.

Experience

• GOOGLE STUDENT AMBASSADOR | GOOGLE

Team Gemini

June 2026– present

- Selected as a Google Student Ambassador 2026 to promote Google AI and developer technologies on campus.
- Organized workshops, technical sessions, and community events while creating awareness of Google tools and programs.
- Collaborated with students, faculty, and fellow ambassadors to grow the campus tech community.

• RESEARCH & DEVELOPMENT LEAD | SIH 2025 FINALIST

Smart India Hackathon

Aug 2025 – Dec 2025

Led research, system architecture, and technical innovation for an AI- and blockchain-based Blue Carbon MRV platform.

Designed scalable solutions for accurate carbon monitoring, reporting, and verification. Collaborated with a cross-functional team to translate research into a real-world, deployable solution.

• VOLUNTEERING

Google Cloud Community India

Aug 2024 – present

Google Developers Group Udaipur

Jan 2024 – present

As a Core Team Member:-

- Managed event operations and execution from crowd access to tech support and various other encompassing community activities.
- Won amazing award at event
- met amazing tech enthusiasts and
- built and stacked new connections

• MEMBER

Women Techmakers

July 2025–Present

Active member of Google Women Techmakers, a global community empowering women in technology. Engaged in networking, mentorship, and tech skill-building initiatives.

• MEMBER

Toastmasters international

July 2024 - July 2025

Member of Toastmasters International for one year, focused on developing public speaking, communication, and leadership skills through regular club activities and presentations.

Education

TECHNO NJR INSTITUTE OF TECHNOLOGY, UDAIPUR

BACHELOR OF TECHNOLOGY
(B.TECH), COMPUTER SCIENCE
& ENGINEERING

CGPA: 9.8/10

SEP 2024 – JUL 2028

SKILLS

- Java, C++, Python, JavaScript
- HTML, CSS, React, Node.js
- Full-Stack Development
- DBMS, MySQL
- Data Structures & Algorithms
- OOPs
- Git & GitHub
- Docker, Kubernetes
- VS Code, Postman
- Artificial Intelligence & Generative AI
- Cybersecurity
- Technical Documentation
- Public Speaking

PROJECTS

1.Blockchain Based Blue Carbon MRV System (SIH 2025)

Developed a Blue Carbon MRV (Monitoring, Reporting, and Verification) system for tracking carbon sequestration in coastal ecosystems.

Integrated satellite imagery, IoT sensors, and AI analytics to collect and analyze real-time environmental data.

Measured key parameters such as biomass, soil carbon content, and ecosystem health.

Enabled accurate carbon accounting and transparent verification for blue carbon credits.

Designed to support climate action, sustainability programs, and carbon offset projects through reliable data insights.

2.AI based Smart Trash Utilization and Management System (Nasa Space Apps Challenge 2025)

Built a Trash Management System for Mars enabling sustainable waste handling in space habitats.

Used AI sorting, robotic collection, and IoT monitoring for efficient waste processing.

Featured a closed-loop recycling system to convert waste into reusable resources.

Designed for zero-waste, self-sustaining Martian operations.

3.College Management System

Built a Trash Management System for Mars enabling sustainable waste handling in space habitats.

Used AI sorting, robotic collection, and IoT monitoring for efficient waste processing.

Featured a closed-loop recycling system to convert waste into reusable resources.

Designed for zero-waste, self-sustaining Martian operations.

4.Virtual Reality Models (International Space Station, Mars Habitat Environment)

Developed immersive Virtual Reality models of the International Space Station (ISS) and Mars Habitat Environment to simulate real-life space living conditions.

Created high-fidelity 3D environments using optimized assets for smooth VR performance.

Implemented interactive elements to demonstrate crew living spaces, navigation pathways, and habitat operations.

Designed the VR experience to support education, training, and research on future space missions.

Certifications & Achievements

- **SMART INDIA HACKATHON 2025 - FINALIST**

issued - Dec 2025
